

Irca Ingeniería y Servicios S.C. Ingeniería Ambiental

Date: September 8, 2026

To Whom It May Concern:

I, Juan Carlos Aguilar Ibarra, General Director of Irca Ingeniería y Servicios S.C. (IRCA Consultores), confirm that Marcelo Guzmán de la Garza was employed by this firm on a full-time basis from September 8, 2025, to September 8, 2026, first as Project Manager and, from April 2026, as Environmental Compliance Coordinator.

He owned 39 regulatory and consulting engagements end to end for 13 clients across 12 sectors, including environmental impact statements, operating licenses and certificates, legal requirements matrices, discharge and waste registrations, and ESG and compliance reports.

He also built the firm's remote sensing capability and directed its use for environmental monitoring and topographic mapping. Before leaving, and without being asked, he trained colleagues in the field to operate the survey equipment and left them written operating procedures.

On his own initiative, he developed two applications still in use by our consulting teams: one that assembles biodiversity listings, and one that summarizes pollutant release and transfer data. He trained the team on how to use both.

He supervised project staff and coordinated field teams at client sites, met his commitments, and required minimal direction. He leaves this firm in good standing and with our recommendation.

Sincerely,

A handwritten signature in blue ink, appearing to read "Juan", is written over a horizontal line.

JUAN CARLOS AGUILAR IBARRA, ENG., M.SC.

General Director

Irca Ingeniería y Servicios SC
