

Irca Ingeniería y Servicios S.C. Ingeniería Ambiental

Date: September 8, 2026
To Whom It May Concern:

I, Juan Gualberto Antonio Pérez, Operations Director of Irca Ingeniería y Servicios S.C. (IRCA Consultores), was Marcelo Guzmán de la Garza's direct supervisor from September 8, 2025, to September 8, 2026.

As a Project Manager and later as an Environmental Compliance Coordinator, he carried a portfolio of 39 engagements for 13 clients across 12 industrial sectors. He closed 38 and handed off one in progress when he left, at a median of 30 days from assignment to delivery. Of the 34 that carried a committed date, 28 landed on time or within the grace period.

As a biologist, Mr. Guzmán owned the scientific content behind all his projects. He ran biological surveys and forest inventories and checked the field data against applicable normative standards.

He also established our UAV operations from the ground up and made them a standard part of how we verify field conditions against permit requirements, producing the orthomosaics, 3D models, and the supporting cartography.

He developed two applications for the company: one for assembling biodiversity lists for impact assessments, and one for summarizing toxic pollutant release and transfer. He developed them on his own initiative, outside his assigned tasks, to take the repetitive parts of our work off the team. This was typical of how he worked.

One initiative surprised me. Noticing that his colleagues struggled with our international clients, and drawing on his own background in language teaching, he offered to teach business English to the team. He negotiated with management, setting the schedule and costs, and ran the sessions himself. As his student I witnessed again the dedication he brings to his work.

He managed his own scope and schedule, supervised field teams, and dealt directly with federal, state, and municipal regulators, with little oversight needed from me. I recommend him without reservation and would gladly confirm any of the above.

Sincerely,

A handwritten signature in blue ink, appearing to be "JGAP", is written over a horizontal line.

JUAN GUALBERTO ANTONIO PEREZ, ENG., M.SC.

Operations Director
